

Most workplace problems don't start as big problems.

They start as small signals.

PEOPLEPULSE

Understand how your people are feeling. Before it becomes a bigger problem.

EMPLOYEE ENGAGEMENT

SENTIMENT

PEOPLE ANALYTICS

HR usually finds out when it's already too late.

Small signals get missed for weeks. By the time anyone reacts, performance, trust, and people have already walked out the door.

The signal was always there. It just arrived at the wrong end of the timeline.

TRADITIONAL

Problem → Reaction

Surveys run once a quarter. Insights land weeks later. HR only sees the damage after the fact.

PEOPLEPULSE

Signal → Insight → Action

Lightweight daily check-ins surface trends in real time, so managers act while the signal is still small.

PEOPLEPULSE MOVES THE SIGNAL TO THE BEGINNING.

Who is PeoplePulse for?

Three roles. Three different pains. One shared signal.

Employee

"I need a simple way to share how I'm feeling."

60-SECOND CHECK-IN

ANONYMOUS OPTION

NO MANAGER READ

Manager

"I need visibility into my team's health."

TEAM TRENDS

ENGAGEMENT SCORE

1:1 TALKING POINTS

HR

"I need meaningful signals to act earlier."

ORG-WIDE PULSE

SENTIMENT ANALYSIS

PRIVACY-SAFE AGGREGATES

Meet PeoplePulse.

PeoplePulse turns simple daily check-ins into meaningful engagement, sentiment and team-health insights.

Each cycle takes ~60 seconds from the employee and produces a daily, privacy-safe signal for the manager.

60 seconds from feeling to insight.

A short, daily cycle that turns a single honest answer into a trend the manager can act on.

01

Employee checks in

A short daily pulse: how are you feeling, workload, stress — ~60 seconds.

Any thoughts on your workload, stress level, or wellbeing today?

Submit

→ 02

PeoplePulse captures the signal

Engagement index is computed deterministically from workload, manager support, team collaboration, motivation, and stress balance.

Engagement Index 78

→ 03

Dashboard identifies trends

Daily signals aggregate into weekly trends, sentiment distribution, and stress indicators.

Check-in rate 92%

→ 04

Manager gets actionable insight

PulseAgent turns trends into 1:1 talking points the manager can use that day.

Workload sustainability dip in CS team

3 talking points ready for next 1:1

Suggested follow-up question drafted

Here's what we actually built.

Every panel below ships in the live app at peoplepulse-app.vercel.app — no mockups, no fake UI.

From thousands of individual signals to one clear picture.

The product's job is not to show more data. It is to show less — with more meaning.

It's not another employee survey.

The category has been stuck for 20 years. PeoplePulse changes the rhythm, the surface, and who acts.

TRADITIONAL EMPLOYEE SURVEYS

Once a quarter. Once a year. Once it's too late.

- ✗ Periodic (quarterly or annual)
- ✗ Long forms, low completion
- ✗ Delayed feedback (weeks later)
- ✗ Static PDF reports
- ✗ Reactive — only after issues escalate

NEW · PEOPLEPULSE

THE RHYTHM IS THE PRODUCT

A continuous signal. A daily pulse. An action loop.

- ✓ Lightweight 60-second daily check-ins
- ✓ Continuous, real-time signals
- ✓ Real-time manager visibility
- ✓ Trend-based insights, not snapshots
- ✓ Proactive action via PulseAgent

! WHY THIS NEEDS TO EXIST: THE RHYTHM IS THE PRODUCT.

What's happening under the hood?

A clean, production-grade stack. No toys, no throwaway prototypes.

Only technologies actually used in the live build. No resume padding.

Built to work, not just to look good.

Real engineering, deployed and live. Each capability below is implemented and running.

Authentication

1

JWT + Supabase Auth, password reset, employee/manager/HR roles

Data Storage

2

Supabase / Postgres, row-level security, organisation isolation

User Roles

3

Employee, Manager, HR — each with scoped dashboards

API Integration

4

Slack webhook delivery with autonomous failover to email queue

Engagement Scoring

AI

Deterministic index from workload, manager support, collaboration, motivation, stress balance

Analytics

6

Weekly trends, sentiment distribution, check-in rate, stress level

Sentiment Processing

7

PulseAgent tags free-text comments and surfaces team-level signals

Responsive UI

8

Mobile-first, works on any device, no app install required

Deployment

✓ LIVE

Live on Vercel with Edge runtime, HTTPS, automatic deploys

LIVE DATA PATH

CHECK-IN → ACTION IN ~ 60 SECONDS

Check-in form

Supabase write

Engagement index

Team aggregate (n ≥ 3)

Manager dashboard

PulseAgent

People analytics shouldn't become people surveillance.

Privacy is a feature, not a setting. It is enforced at the database level — not just promised in a policy.

ANONYMOUS PRIVACY GUARANTEE

Irreversible at the database layer.

$N \geq 3$ AGGREGATION RULE

ANONYMOUS BY DEFAULT

Meaningful signals, not constant monitoring

One 60-second pulse per day. No keystrokes, no location, no behaviour tracking. Ever.

Employee trust, not surveillance

Names are detached from submissions before they hit the database. Anonymous submissions cannot be deanonymized — in the database or in logs.

Actionable insights, not unnecessary data

Team-level insights unlock only when $n \geq 3$ check-ins are received. Below that threshold, comments stay locked.

Why does PeoplePulse matter?

The signal moves from the individual to the organisation — without ever exposing the individual.

EARLIER SIGNALS

Issues surface in days, not quarters.

Managers see drift before it becomes damage.

BETTER MANAGER CONVERSATIONS

1:1s start from data, not guesswork.

PulseAgent drafts 3 talking points for every check-in.

DATA-DRIVEN HR

HR acts on trends, not anecdotes.

Sentiment, engagement, stress — privacy-safe at org level.

HEALTHIER TEAMS

Workload and wellbeing stay visible.

Sustained engagement, sustained trust.

HOW IMPACT FLOWS THROUGH THE ORGANIZATION

Employee

Manager

HR

Organization

No invented statistics. Impact is structural — the signal simply arrives earlier.

Built for one team. Designed to scale.

The data model and the privacy rule already generalise beyond one team — the product is ready to grow.

What's next for PeoplePulse?

A clear 3-stage path — what is live, what is next, what is on the horizon.

NOW · LIVE

Shipping today.

- ✓ Core daily check-ins
- ✓ Engagement index + 5 dimensions
- ✓ Manager dashboard + PulseAgent insights

Live at peoplepulse-app.vercel.app.

NEXT · 0-3 MONTHS

Where we go next.

- Advanced analytics + team comparisons
- Automated engagement alerts
- Custom HR reports + exports

Already designed, not yet shipped.

FUTURE · 3-12 MONTHS

On the horizon.

- ◆ AI-powered recommendations
- ◆ Predictive engagement signals
- ◆ HRMS + Slack + payroll integrations, personalised interventions

Visually labelled future — not in the current build.

EXISTING FUNCTIONALITY → NEXT PHASE → FUTURE HORIZON.

Don't wait for people problems to become business problems.

Listen earlier. Understand better. Act sooner.
